**IV. New Business:**

- A. Consider whether LRT Council meetings fit the definition of qualifying CE for LRT's under K.A.R. 100-73-7.

The council did not see the necessity of determining council meetings meet the definition of qualifying CE.

- B. Board response to proposal to consider amending LRT statutes and regulations regarding unlicensed practitioners and continuing education requirements.

Assistant general counsel communicated the Board view that it should remain neutral in regards to amending the unlicensed exception in the LRT statutes, and that the local or national advocacy groups should be approached if legislative change is desired.

Discussions will continue as to how to best audit unlicensed individuals. A primary concern is CTs performed by unlicensed individuals. The typical x-ray course taken would not be sufficient to ensure competency if unlicensed individuals are performing CTs.

**V. Old Business:**

- A. Licensure fee increases through regulatory changes. Information only.
- B. Request will be made for Board approval of entering into a contract with KMS-PHP to perform monitoring services for LRT's pursuant to K.S.A. 65-4924(b). No person in attendance including staff who attended last meeting were aware what this referred to. Reese Hays, Disciplinary Counsel, stated the board is contract with HAPN and would not be able to contract with KMS. This item will be removed from the agenda unless further information clarifies what it is referring to.
- C. Timing issues with educational institutions providing official transcripts for LRT licensure. Information only.
