A summary of the proposed amended regulations and the economic impact follows:

K.A.R. 100-15-4, K.A.R. 100-15-5 (Continuing Education Standards, Definitions, Requirements)

The purpose of these regulation amendments is to add a third category of required continuing medical education activity addressing pain management, prescribing opioids, and the use of prescription drug monitoring programs under K.S.A. 65-2809.

The regulations add a third category of continuing medical education but do not increase the total number of continuing medical education hours required or change the process for renewal of a license. Costs include routine state resource costs associated with promulgating these regulations. The agency does not believe the regulations will meaningfully impact the revenue of cities, counties, or school districts, except to the extent that additional business activity is generated in the state due to the addition of a third category of approved continuing medical education activity. These regulations were developed during publicly noticed open meetings of the Board, and the Board is following all notice and open meeting hearing requirements associated with promulgating these regulations, which will entail at least 3 more open meetings related to these regulations.
